## 分数の引き算① (16)

## 分母が同じ引き算にするよ $1 - \frac{4}{6} = \frac{2}{6}$ $1 = \frac{6}{6}$ $\frac{1}{6}$ $\frac{1}{6}$ $\frac{1}{6}$ $\frac{6}{6} - \frac{4}{6}$

## なまえ

$$\frac{4}{6} - \frac{2}{6} =$$

$$9 \frac{6}{7} - \frac{3}{7} =$$

$$2 \quad 1 \quad -\frac{3}{5} =$$

$$\frac{3}{4} - \frac{2}{4} =$$

$$\frac{6}{8} - \frac{4}{8} =$$

1 
$$-\frac{5}{9} =$$

$$4 \frac{6}{7} - \frac{5}{7} =$$

$$\frac{6}{10} - \frac{5}{10} =$$

$$\frac{5}{6} - \frac{3}{6} =$$

$$\frac{5}{7} - \frac{1}{7} =$$

$$6 \frac{3}{5} - \frac{2}{5} =$$

$$\frac{3}{6} - \frac{2}{6} =$$

$$\bigcirc \frac{5}{8} - \frac{2}{8} =$$

$$\frac{4}{5} - \frac{2}{5} =$$

$$\frac{4}{7} - \frac{3}{7} =$$

$$\frac{6}{9} - \frac{1}{9} =$$
